1. New Approaches to Arrhythmia Detection and Treatment

Release Date: 03-03-2010Open Date: 03-05-2010Due Date: 01-08-2013Close Date: 01-08-2013

The purpose of this initiative is to improve our ability to detect, prevent, and treat all forms of cardiac arrhythmias. This initiative will encourage small business firms to develop improved diagnostic and therapeutic tools, products, or devices for cardiac arrhythmia monitoring, detection and treatment. Background Cardiac arrhythmias represent a major source of public health bur ...

2. Image-Guided Cancer Interventions

Release Date: 01-07-2010Open Date: 03-05-2010Due Date: 01-08-2013Close Date: 01-08-2013

Purpose This Funding Opportunity Announcement (FOA), issued by the National Cancer Institute (NCI), encourages Small Business Innovation Research (SBIR) grant applications from small business concerns (SBCs) that propose the development and clinical validation of systems for image-guided interventions (IGIs) for cancer. Specifically, the goals of this program are to provide support for: T ...

3. Novel Tools for Investigating Brain-derived GPCRs in Mental Health Research

Release Date: 01-07-2010Open Date: 03-05-2010Due Date: 01-08-2013Close Date: 01-08-2013

Background G-protein coupled receptor proteins (GPCRs) are membrane bound proteins that serve to modulate cellular activities. Many of the GPCRs have potential significance in healthy mental function and in mental disorders, including receptors for serotonin, glutamate, dopamine, opioids, GABA, orexins, somatostatin, muscarinic, cannabinoid, adrenergic, Neuropeptide Y, corticotropin releasing fa ...

4. Image-Guided Cancer Interventions

Release Date: 01-06-2010Open Date: 03-05-2010Due Date: 01-08-2013Close Date: 01-08-2013

Purpose The purpose of this funding opportunity is to support the development and clinical validation of systems for image-guided interventions (IGIs) for cancer. Specifically, the goals of this program are to provide support for: The development and optimization of fully integrated cancer imaging, monitoring, and therapy systems; Validation of integrated image-guided intervention (IGI) ...

5. Optimization of Small Molecule Probes for the Nervous System

Release Date: 08-26-2009Open Date: 11-05-2009Due Date: 09-08-2012Close Date: 09-08-2012

The purpose of this funding opportunity is to facilitate the development of small molecule probes that will add a pharmacological dimension to basic neuroscience work, and enable proof-of-principle studies linking nervous system therapeutic targets, mechanisms or phenotypes to disease onset or progression. NIH has made a significant commitment to probe development via Institute-specific and Blue ...

7. Directed Stem Cell Differentiation for Cell-Based Therapies for Heart, Lung, and Blood Diseases

Release Date: 08-12-2009Open Date: 11-05-2009Due Date: 09-08-2012Close Date: 09-08-2012

The purpose of this Funding Opportunity Announcement (FOA) is to define the factors and mechanisms controlling the differentiation of embryonic or adult stem or progenitor cells, either in vitro or in vivo. The FOA is designed to stimulate new scientific advances in stem cell differentiation including technology research that may not be hypothesis driven. The long-range goal of this program is the ...

9. Innovations in Biomedical Computational Science and Technology Initiative

Release Date: 08-05-2009Open Date: 11-05-2009Due Date: 09-08-2012Close Date: 09-08-2012

This announcement covers broad-based research in biomedical informatics and computational biology, and is coordinated by the NIH Biomedical Information Science and Technology Initiative (BISTI) committee. Through this and related opportunities, Institutes and Centers of the NIH offer support for: fundamental research in biomedical informatics and computational biology; development of new computati ...
